Introduction to Big Data (2015)

Hadoop 平台和应用程序框架

Introduction to Big Data  
Analytics (September 2015  
Version)

Machine Learning With Big Data  
(September 2015 Version)

Graph Analytics for Big Data  
(2015)

大数据 - 毕业项目

10/24/2016

**Yihong Chen**

has successfully completed the online, non-credit Specialization

## 大数据

In this Specialization, you will develop a robust set of skills that will allow you to process, analyze, and extract meaningful information from large amounts of complex data. You will become proficient in carrying out scalable basic analysis and comfortable enough to apply advanced analytics, predictive modeling, or graph analysis to problems in your domain. In the final Capstone Project, developed in partnership with data software company Splunk, you'll apply the skills you learned by tuning and scaling your own analysis, building your own model, applying tools in new ways, or some other similar kind of effort, to analyze big data in the whatever area of your choice.

Paul Rodriguez,  
Research Programmer  
Amarnath Gupta,  
Director, Advanced  
Query Processing Lab  
Andrea Zonca, HPC  
Applications Specialist  
Natasha Balac, Director,  
Predictive Analytics  
Center of Excellence  
(PACE)
